# Vapormatic Quality Cab Glass

An extensive range of toughened and laminated cab glass matching OE specification.

## Vapormatic Toughened Glass

The toughened glass production process increases the strength up to five times. It has built-in break-safe characteristics, causing the glass, when broken, to disintegrate into relatively harmless small pieces. It also has increased resistance to thermal shock.

## Vapormatic Laminated Glass

Laminated glass is usually found on a vehicle's forward facing view and provides the operator a built in safety feature. Following impact, cracks are almost certain to occur, although the integrity of the glass is preserved, offering protection against the elements and any attempted intrusion.

Draught excluder and glazing rubber also available, ask in store for more information and pricing.

Popular applications include:  
Ford, Case, John Deere,

## Hydraulic Top Links

These hydraulic top links from Walterscheid with integrated shock absorber, have been designed to increase tractor performance and safety. Reducing implement bounce keeps the front axle in contact with the ground, providing more traction, and therefore productivity, with additional safety benefits. The innovative shock absorber system is integrated into the hydraulic cylinder, and so does not use additional space. Compatible and interchangeable with standard top links.
